Notes:

Skincare 101 - For results beyond the treatment room

PCA SKIN®'s line of daily care products can be customized into a regimen unique to your skin. To make the most of your regimen, follow a few simple tips:

Tip 1

After cleansing, use any spot treatments. Next, apply your products from thinnest to thickest. This ensures your products are as effective as they can be by how your skin best absorbs them.

Tip 2

Many people think more product is more effective, but that's not always the case. Use the recommended amount of each product, especially for the first few months, and talk to your PCA SKIN® Certified Professional if you want to accelerate results.

Tip 3

In the shower, wash your face after shampooing. This removes any shampoo residue on your skin that can be left behind and cause breakouts or irritation.

The Post-Procedure Solution

Designed to soothe and hydrate the skin after a chemical peel or alternative professional treatment, this collection of products will help the skin rebound faster and give you better results. Talk to your PCA SKIN® Certified Professional about taking home a Post-Procedure Solution after your treatment.
